### Product Description

#### Description

#### Introduction:

Welcome to the world of Emax Porcelain Veneers, where beauty meets functionality. As a manufacturer located in China, we specialize in wholesale products to merchants outside of China. Our porcelain veneers are an innovative and versatile solution for those who want to enhance the look of their teeth.

Our Product

**What are Emax Porcelain Veneers?**

Emax Porcelain Veneers are thin, custom-made shells that cover the front surface of teeth to improve their appearance. They are made from high-quality porcelain that offers superior aesthetics and durability. These veneers are an excellent option for those who have stained, chipped, or misaligned teeth, and want to achieve a brighter, more even smile.

What makes Emax Porcelain Veneers different from other veneers?

Emax Porcelain Veneers are renowned for their strength and durability, making them incredibly long-lasting. These veneers are known to retain their color and shape for decades, ensuring that you get the most out of your investment. In addition to this, Emax Porcelain Veneers are also incredibly thin, making them more comfortable to wear and less invasive to fit.

Another unique feature of Emax Porcelain Veneers is their translucency. The porcelain material used in the construction of these veneers has a natural-looking translucency that mimics the appearance of your natural teeth. This means that your veneers will blend seamlessly with your other teeth for a beautiful and authentic-looking smile.

**Benefits of Emax Porcelain Veneers:**

1. Enhance your smile: Emax Porcelain Veneers can improve the color, shape, and size of your teeth. They can correct issues such as gaps, chips, and stains, resulting in a more beautiful smile that you can be proud of.
2. Improve functionality: In addition to being aesthetic, Emax Porcelain Veneers can also improve the functionality of your teeth. They can help to restore the natural chewing surface of your teeth and prevent further damage to your existing teeth.
3. Long-lasting: Emax Porcelain Veneers are incredibly durable and can last for up to 20 years with proper care. This means that you can enjoy a beautiful smile without having to worry about frequent replacements.
4. Comfortable and non-invasive: Emax Porcelain Veneers are incredibly thin, making them more comfortable to wear and less invasive to fit than other veneer options.

**How are Emax Porcelain Veneers fitted?**

The process of fitting Emax Porcelain Veneers is simple and painless. First, a small amount of enamel is removed from the front surface of your teeth to create room for the veneers. Next, impressions of your teeth are taken and sent to our lab, where your custom-made veneers are created. Finally, the veneers are bonded to your teeth, resulting in a natural-looking and beautiful smile.

**Conclusion:**

Emax Porcelain Veneers are an excellent investment for those who want to achieve a beautiful and authentic-looking smile. With their superior durability, superior aesthetics, and non-invasive fitting process, they are a clear choice for anyone seeking a long-term solution for their dental issues. If you're interested in learning more about our Emax Porcelain Veneer products, please don't hesitate to contact us today. We look forward to hearing from you!

**Production Introduction:**

Emax veneers are thin pieces of porcelain which are placed over the top of your real teeth. They are usually suitable for patients who have straight teeth and are looking to change the shape and size of their teeth. Get a perfect bright smile for a lifetime from a China Dental Lab Veneers are the perfect solution for it, fixing your teeth and hiding your flaws, and boosting your confidence. We can also help to fill the gap between teeth.

**Product Parameter**

Customized

**Product Feature and Application**

Emax Veneers are well-known for their durability and stabilising effects, being fitted without the need for tooth etching as is the way with more traditional dental veneers. Furthermore, the materials used to make up emax veneers are glazed to give an overall more natural smile than other porcelain materials.
