E.max IPS Veneers	Layered Zirconia Veneers

Applications:

The Dental Veneers by ADS are prepared in such a way that no tooth reduction is required. This makes them a non-invasive option for those who want to enhance their smile. The procedure time for these veneers is short, making it convenient for busy individuals who cannot afford to spend long hours at the dentist's clinic.

Customization is available for the Dental Veneers by ADS. This means that the veneers can be made to match the color, shape, and size of the natural teeth, giving a natural and pleasing appearance.

ADS has partnered with Emax Veneer Dental Lab and Veneer Dental Lab to produce these veneers. Both these labs are known for their expertise and use of advanced technology in producing dental veneers. This ensures that the Dental Veneers by ADS are of high quality and provide long-lasting results.

The Dental Veneers by ADS are available in different types, including Layered Zirconia Veneers. These veneers are made from layered zirconia, which is a strong and durable material. This makes them a suitable option for those who have discolored, misshapen, or damaged teeth.

Overall, the Dental Veneers by ADS are a reliable and convenient option for those who want to improve their smile. They are non-invasive, require no tooth reduction, have a short procedure time, and are customizable. With the use of advanced technology and expertise from Emax Veneer Dental Lab and Veneer Dental Lab, the Dental Veneers by ADS are of high quality and provide long-lasting results.
